### Detailed Action

1. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The phrase "per se" does not further limit the claim.

2. Claim(s) 2 is/are objected to for being substantial duplicates of claim 1. When two claims in an application are duplicates, or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to reject the other as being a substantial duplicate of the allowed claim.

M.P.E.P. 706.03(k). This objection can be overcome by deleting claim 1.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 7 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: The reaction steps, conditions, and reactants involved in using the intermediate compound found in claim 6 to synthesize the endproduct compound found in 1 are missing. The reaction steps, conditions, and reactants involved in synthesizing the final product are essential to practicing the invention of the process of producing the final product.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. In claim 5, lines 1-2, the phrase "one or more other pharmacologically active compounds" is indefinite because it is not clear what other pharmacologically active compounds the applicant is claiming?

4. Claims 1, 3, 4, and 6 are allowable.
